

Statement of Public Task

This statement sets out the functions carried out by the University of Sussex Library that are within our public task under the [Re-use of Public Sector Information Regulations 2015](#) (the “2015 Regulations”)

The public task of the Library is articulated in its Strategic Plan.

The Library undertakes selective digitisation of items in its collections and facilitates re-use wherever copyright law, data protection and the availability of funding allow. The Library does not have a dedicated budget for digitisation, so is reliant on charging fees for the digitisation, supply and licensing of content in order to meet those costs.

Information available for re-use

University of Sussex Library material which falls within the public task and therefore is potentially available for re-use can be located as follows:

- Information resources in various formats searchable via Library search

- Digitised material and original material from Special Collections available from The Keep catalogue
